

RADIO CONTROLLED MODEL RACING YACHT

Vortex Model Engineering announces that the SOLING-M is now available as a construction kit. This 50 inch model maintains the high standards of quality established by the SANTA BARBARA ONE DESIGN model racing yacht (shown with the SOLING-M in the above photo). Though smaller and more portable than the S/B, performance is outstanding. Highly maneuverable, SOLING-M can be sailed in waters where it is not feasible to sail larger boats.

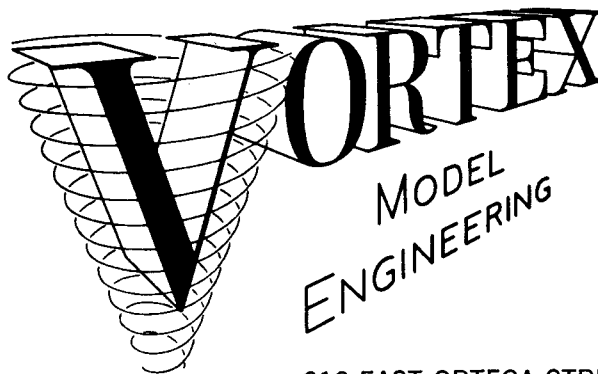

To simplify assembly the kit includes a hull with factory-installed keel mounts, indexed rudder shaft location, and scribed waterline. The deck has scale texturing with indexed hardware locations and pine back-up blocks installed on the underside. Both deck and hull are finished in white gel-coat, and a molded deck flange guarantees perfect alignment when joining these parts. Cast-iron removable keel has machined hull-mating surface with mounting holes drilled and tapped. Die-cast aluminum spade rudder has a stainless steel shaft. Wood parts are pre-cut and all hardware, fittings, stainless steel wire and running line required to rig the yacht are included in this outstanding kit. Customers have a choice of six Vortex sail colors for mainsail and jib combinations.

SOLING-M is a scale model of the 27 foot Soling three-man keel boat which made its Olympic debut at the 1972 Kiel Olympics. Only minor changes in scale have been made to satisfy American Model Yachting Association 50-800 Class and International Marblehead ("M") Class requirements.

SOLING-M has already established itself as a winner. A prototype yacht won the 1971 AMYA 50-800 Annual Class Championship. Factory assembled boats claimed First Place awards at the 1972 AMYA Western Regional 50-800 Championship and 1972 North American Model Boating Association National Championship in the Marblehead Class.

SOLING-M entries claimed First Place, Second Place, and two SOLING-M yachts tied for Third Place at the 1972 AMYA Annual Class Championship, 50-800 Class, August 26-27 at Memphis, Tennessee.

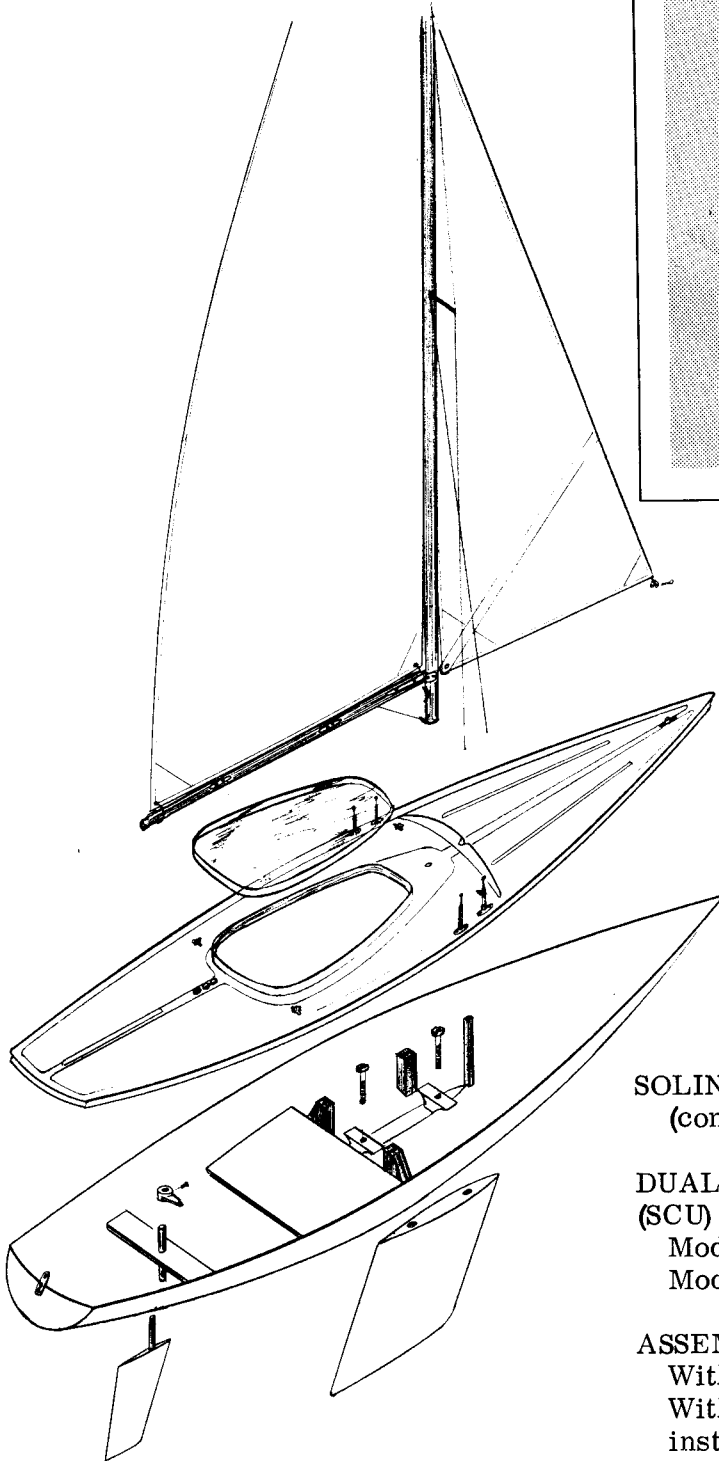

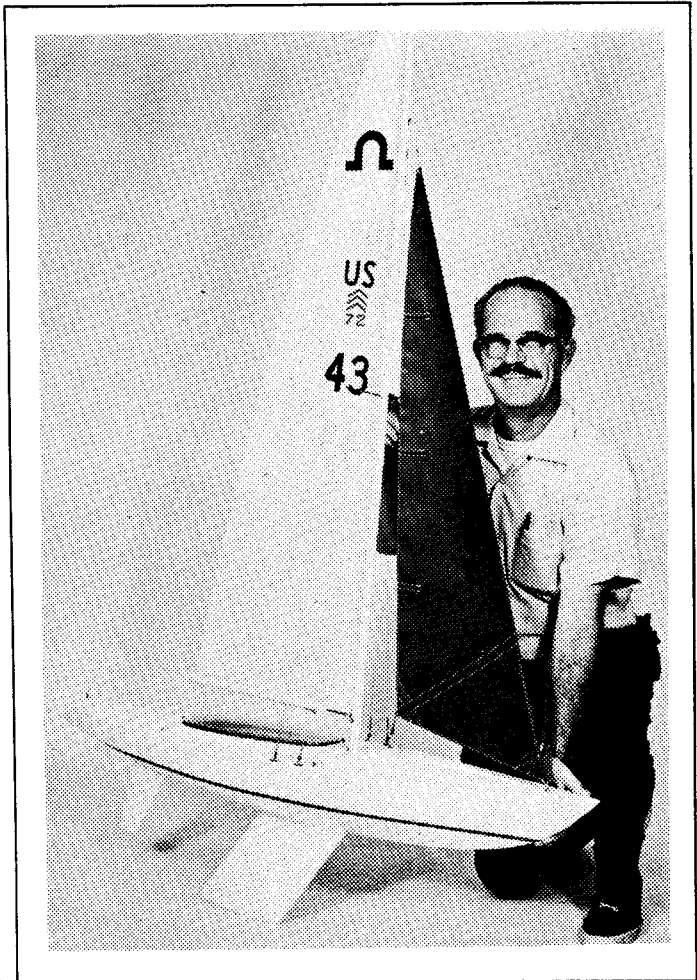

LENGTH..... 50 inches
 MAST..... 60 inches
 SAIL AREA..... 800 square inches
 DISPLACEMENT..... 17 pounds
